PLAYING INSTRUCTIONS

You are able to fire missiles from the three bases at the top of the screen. Choose which base by moving the joystick to the right. This will move the dash which appears over the base, and will tell you which one you are firing from.

Press the joystick button once to launch the missiles, and another time to explode them. If the germ is near the explosion, he will die.

The farther down the screen the germ is, the more points you get. Shooting from the left base gives you four times as many points as the middle base, and shooting from the middle base gives you two times as many points as the right base. Lose points by wasting bombs and letting germs escape.

Good luck!!!
